PREFACE

THIS book is an abridgment of the author's *Etymological Dictionary of Modern English* published in 1921. The process of abridgment has been carried out, not by omitting the less common words (for it is usually the uncommon word or the neologism that excites legitimate curiosity¹), but by making the explanations as brief as possible and by abstaining from the discussion of unsatisfying conjectures. It contains the whole of our literary and colloquial vocabulary, together with sufficient indications to show the origin of modern scientific terms. The less familiar of these will be found under their separate elements, e.g. for *chirômancy* see *chiro-* and *-mancy*, for *stethoscope* see *stetho-* and *-scope*. Compounds and derivatives are not given as a rule, if they can be inferred from the simple word. Account has been taken of what has been done in etymology in the last few years, and some of the statements in the larger book are corrected or modified. A number of new words of quite recent introduction are here for the first time "booked" and explained. Some may think excessive hospitality has been shown to archaic and foreign words. Their inclusion is part of a pious debt that the author owes to Scott, Fenimore Cooper and "Ballantyne the brave," who started him collecting words at an age when most boys succumb to the fascination of stamps.

Each word is traced back so far as it can be done with reasonable certainty, e.g. the entry "*marmalade*, F. *marmelade*, Port. *marmelada*, from *marmelo*, quince, by dissim. from L. *melimelum*, G. *μελίμηλον*, lit. honey-apple," might be reversed and amplified as follows: "From *μέλι*, honey, and *μήλον*, apple, the Greeks made a compound *μελίμηλον*, quince. This word was borrowed by the Romans as *melimelum*. Passing into Portuguese it became, with dissimilation (see p. xvii) of *l-l* to *r-l*, *marmelo*, from which, by means of the suffix *-ada*, was formed *marmelada*, compost of quinces. French borrowed this, substituting, as usual, *-ade* for *-ada*, and we have taken it from French with a slight accidental change of

¹ "You mean to say you want to be a reporter and don't know what *onomatopoea* means? Perhaps you can tell me what *shillelagh* means? You don't know? Now, what is *mithridatism*, and what's a *mittimus*? And what is *rachitis*, *gorgonzola*, *spectioneer*, *agiotage*, *dolichocephalic*, *tamp*—now, there's a short word for you. What, you don't know? And you want to be a reporter?" (John Cournois, *The Wall*).

spelling." The use of the word "from" in the *Dictionary* implies that a word does not phonetically represent its original, but is altered from it by the use of a suffix or otherwise. Thus Old French *popler* (now *peuplier*), whence English *poplar*, is described as "from" Latin *pōpulus*, because a suffix has been added to the original. So also our verbs in *-ate* are "from" Latin verbs in *-are*, being formed from the past participle of such verbs, e.g. *create* is "from" Latin *creare* (p.p. *creatus*).

For Aryan words (see p. xi) the cognates are given from Teutonic, Celtic, Slavonic, Latin, Greek and Sanskrit; for Common Teutonic words (see p. xi), the cognates from Dutch (or Frisian or Low German), German, Old Norse and (if recorded) Gothic; for West Germanic words (see p. x), the cognates from Dutch (or Frisian or Low German) and German. Words from the Romance languages (see p. xii) are traced to their Latin (or Greek or Teutonic or Celtic) originals, and, where confirmation of the theoretical Vulgar Latin form (see p. xii) seems to require it, Romance cognates are quoted. The relationship of Latin and Greek words to those of the other Aryan languages is indicated whenever such relationship can be clearly shown to exist. It must not be supposed that "cognates" are derived from each other. English, Dutch, Scandinavian and German words are first cousins, not parents and offspring. They have more distant relatives in Latin, Greek, Celtic, and Slavonic, and very remote kinsmen in Persian and Sanskrit.

I wish to express my grateful thanks to the learned friends and confrères who have been kind enough to give me the benefit of their specialist knowledge. They are—

ETYMOLOGICAL DICTIONARY	i

THE ENGLISH VOCABULARY

ALTHOUGH the majority of the words contained in modern English dictionaries are, immediately or ultimately, of Latin origin, English is nevertheless, by its phonetic system, its grammatical structure and its everyday vocabulary, a Teutonic language.¹ It belongs to the Low German group, which includes also Dutch (Flemish), Frisian² (spoken on the islands off the North Sea coast of Germany), and a number of North German dialects (Plattdeutsch), for which, unfortunately, there is in English no collective name except Low German. Old Low German of the Continent is represented in literature by Old Saxon, preserved in a long Biblical poem, the *Heliand* (Saviour), of rather later date than the Anglo-Saxon *Beowulf* (8th cent. A.D.).

Low German is distinguished from High German by the fact that it did not undergo the second sound-shifting (mutation of consonants), which differentiates High German from all the other Teutonic languages.³

Owing to geographical and political separation High German has made little direct contribution to the vocabulary of English, while contiguity and trade relations have caused pretty extensive importations from Dutch and from the Low German dialects of the North Sea and Baltic coasts. But we have borrowed through French many words of High German origin and for comparative purposes High German is of great value. It has an extensive and continuous literature and can be divided into Old High German, Middle High German, and Modern German with very much the same chronology as our own Anglo-Saxon (often called Old English), Middle English, and Modern English.⁴

¹ Le vocabulaire peut se transformer, même de fond en comble, sans que la langue en soit altérée sensiblement dans sa structure phonétique ou grammaticale (Vendryes, *Le Langage*).

² There was probably a Frisian element among the "Anglo-Saxons."

³ The High German consonant system may be illustrated by such words as *tal* (dale), *sahm* (tame), *drei* (three), *werden* (worth²), *sache* (sake), *pferch* (see paddock), *lieben* (love).

⁴ The Middle period of each language may be dated c. 1100-1150 to 1450. It is distinguished from the Old by the simplification of inflexions, as well as by regular phonetic changes. The Romance languages have no similarly defined "Middle" period, so that what is not Modern French (Italian, Spanish) may conveniently be called Old French (Italian, Spanish).

The Low and High German languages form together the West Germanic branch of Teutonic. They possess a large number of words not recorded in the other Teutonic languages. Examples are *beer*, *bosom*, *cress*, *fight*, *ghost*, *heap*, *hearth*, *herring*, *idle*, *knight*, *make*, *sound* (adj.), etc.

The Anglo-Saxons subdued or expelled the Celts, whose language was completely replaced by the Low German dialects of the invaders. These dialects were four in number, viz. Northumbrian (or Anglian), which became the language of Northern England and Lowland Scotland, Mercian, from the Humber to the Thames, West Saxon, south and south-west of the Thames (excluding Cornwall), and Kentish.¹ It happens that most of the Anglo-Saxon literature is in the West Saxon or Wessex dialect, and therefore it is this dialect that is the basis of our Anglo-Saxon dictionaries; but, during the Middle English period, the South-East Midland dialect, which included London and the two universities, became the standard literary speech, so that Modern English usually represents the Mercian rather than the West Saxon dialect (see *milk*, *old*, *steeple*).

The Anglo-Saxons had not long been settled in their new home, when they had to endure the attack of a kindred race, the Norsemen or Vikings. In English history we usually call them "Danes," though the majority came from Norway. Their language, Old Norse (recorded in Old Icelandic documents), is now represented by Icelandic and the Scandinavian languages (Norwegian-Danish and Swedish) and constitutes the North Germanic branch of the Teutonic family. Its literary remains are not so old as those of the languages already mentioned, the earliest being a collection of poems called the *Edda* (Iceland, c. 1200 A.D.²). The "Danes" acquired large tracts of England, eventually became fused with the Anglo-Saxons and made important additions to the English vocabulary. Such essential everyday words as *egg*, *law*, *plough*, *sister*, *skin*, *get*, *take*, *they*, *them*, are of Old Norse origin.

The Teutonic language that has the oldest records is Gothic, classified as East Germanic, because the Goths settled on the lower Danube. For them Bishop Ulfila translated (4th cent. A.D.) parts of the Bible, and, though their language lingered in the Crimea till the 16th century, this translation is practically our only record of it.³

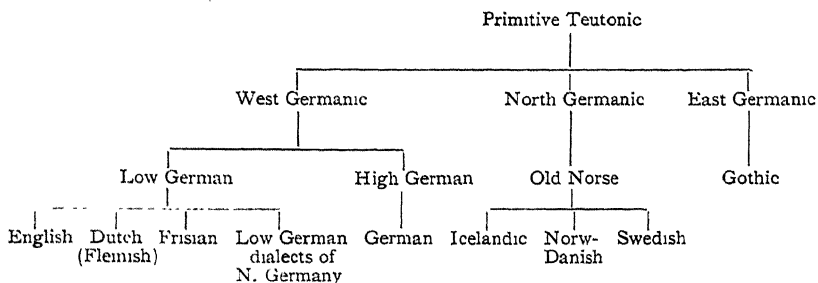

All these Teutonic languages spring from a theoretical "Primitive

¹ The chief characteristic of Kentish is *e* for *i* (see *hemlock*, *left*).

² This is the date of the MS. The poems are really much older.

³ Another tribe of the Goths, the Visigoths, invaded Spain and left some traces of their language in Spanish.

Teutonic," one of the branches of the great Aryan or Indo-European family. They may be represented by a genealogical tree—

Words found throughout the Teutonic languages are called Common Teutonic.¹ The majority of our familiar native words belong to this class, e.g. *axe, blood, god, loaf, hunger, thirst, rain, thief, bread, bold, dumb, even, good, burn, drink, fly, give, run, slay, swear, warp*, etc., also most of the prepositions, pronouns, conjunctions and auxiliary verbs.

The other European² language-groups belonging to the Aryan or Indo-European family are Greek, Italic, Celtic, and Slavonic. The records of the first two are, as we should expect from their early advanced civilization, by far the oldest.

Greek is recorded, in the Homeric poems, from the 7th century B.C. It was divided into a number of dialects—Ionic, Doric, Aeolic, Attic—the last of which eventually prevailed and still exists, not greatly changed, as Modern Greek. Its direct contribution to English does not begin till the Renaissance, but the coinage of scientific and philosophical terms of Greek origin is now continuous. The earliest Greek words passed into Teutonic (as also into the Romance languages) through the medium of Latin, and the oldest contribution is ecclesiastical and theological (*alms, angel, bishop, church, devil, minster, monk*, etc.).

The chief Italic dialects were Latin, Oscan, and Umbrian, the first of which prevailed as Rome prevailed. Latin is, for many reasons, the most important of all languages for the student of European philology. As it gave birth to the Romance languages (Italian, Spanish, Portuguese, Provençal, French, Walloon, Rumanian, etc.), it enables us to study as a reality what in the case of the other branches is more or less theoretical, viz.

¹ This includes some words not found in the scanty records of Gothic.

² Outside the Aryan family are Finnic and Hungarian (Magyar), both belonging to the Finno-Ugrian family, and Basque, of unsolved origin. Turkish is an Asiatic language belonging to the Turanian family.

the evolution of a group of languages from a primitive original. Western Europe was partially civilized by Rome, which gave to the Teutons a great part of the vocabulary connected with commerce (*cheap, dicker, monger*), the practical arts (*ark, chest, kitchen, pullar, tile, street*), horticulture (*cherry, kale, pear*), administration (*mint*², *toll*¹) and Christianity. Via French and, to a less extent, via the other Romance languages, Latin has made a further immense contribution to the English vocabulary, and all through the history of our language there has been a steady influx of words borrowed from Latin by the learned.

It is important to distinguish between Vulgar Latin, *i.e.* the everyday colloquial speech of the Roman soldier and colonist, whence sprang the Old Romance languages¹; Late Latin, *i.e.* literary Latin subsequent to the classical period; and Medieval Latin, *i.e.* the vocabulary of Latin form, but partly composed of non-Latin elements, used by medieval writers and administrators. That form of Medieval Latin peculiar to this country is called Anglo-Latin. Low Latin, used vaguely in all these senses, is better avoided because of its uncertain meaning.

With regard to the great French element in English (beginning with the Norman Conquest) the following points should be noted:—

(1) It was, as already stated, from Vulgar Latin, and not from classical Latin of the short Roman literary period, that French and the other Romance languages derived their original vocabulary and grammar. The chief features that distinguish Vulgar Latin from Ciceronian Latin are (i) the disappearance of the neuter gender²; (ii) the reduction of the six cases to two, nominative and objective, from the latter of which French nouns and adjectives are derived³; (iii) a preference for derivatives, *e.g.* *aeramen* (whence *airain*) for *aes*, *soliculus* (whence *soleil*) for *sol*, *cantare* (whence *chanter*) for *canere*; (iv) the “normalization” of deponents, *e.g.* *morire* (whence *mourir*) for *mori*, *ausare* (whence *oser*) for *audere*, *aus-*.

Many of the forms of Vulgar Latin (marked in the Dictionary with an asterisk) are conjectural, but their genuineness is proved by a comparison of the derivative words in the Romance languages (see *commence*).

(2) French, though a Romance language, has a very important Teutonic

¹ The name Romanic is sometimes given to the almost unrecorded transitional stage of the language, *i.e.* to a type of Vulgar Latin which may be supposed to have prevailed, more or less uniformly, throughout the Roman Empire.

² Neuter words usually became masculine, but occasionally the neuter plural in *-a* was treated as a feminine singular; thus *poma* (neut. pl.) gave *pomme* (fem. sing.), *labra* (neut. pl.) gave *lèvre* (fem. sing.).

³ There are a few exceptions. See *Fitz-*.

element, chiefly due to the Frankish¹ conquest of Gaul in the 5th century. It is usual to derive French words of Teutonic origin from Old High German, but Frankish was, in some of its features, intermediate between High and Low German.

(3) A great many English words of French origin come, not from "French of Paris," but from the dialects (chiefly Norman and Picard) of the north and east of France, collectively called Old North French, which had *c-* for *ch-* (see *catch*), *g-* for *j-* (see *garter*), and the most easterly of which preserved the German *w-* (see *war*), instead of changing it to *gw-*.

(4) Transplanted to England as the language of the governing class, French developed into Anglo-French², with some derivatives (*duty*, *liable*) and meanings unknown to Continental French.

(5) In the case of many "learned" words of Latin origin, it is not possible to say whether they have passed through French on their way into English. *Caitiff* is obviously Old North French *caitif* (cf. French *chétif*), of popular formation from Latin *captivus*, but *captive* may either be the "learned" French *captif* or a direct English borrowing from Latin *captivus*. It is simplest to regard such words as derived from Latin.

(6) A great number of words that came from Latin via French have been restored to a Latin form. *Perfect* has replaced Middle English *parfit*, which is Old French *parfit* (now *parfait*), representing Latin *perfectus*. But, the present form of the word being Latin, it seems fair to say that it is the Latin *perfectus*, without troubling about its obsolete Old French form. So, in this Dictionary, reconstructed words of this class are usually assigned to a Latin etymology.

The Celtic languages are divided into Goidelic or Gadhelic, *i.e.* Scotch-Gaelic, Irish-Gaelic³ and Manx; and Brythonic or British, *i.e.* Welsh, Cornish (extinct) and Breton. The last was taken to France by British refugees fleeing from the Anglo-Saxons. Of the original Gaulish Celtic, expelled by the Latin of the Roman conquerors, there are no literary remains. Celtic has made hardly any direct contribution to the English vocabulary. Any Celtic words of importance reached English via Latin and French (*budget*, *carpenter*, *carry*, *mutton*, *petty*, *quay*, etc.).

¹ Hence the names France and French.

² Some ME. writers, *e.g.* Gower, composed poems in both English and French, and up to the 14th cent. English grammar-school boys construed their Latin into French.

³ As most people connect Gaelic with Scotland, I have in the Dictionary used simply Irish for Irish-Gaelic.

The chief Slavonic languages are Russian, Bulgarian, Serbo-Croatian, Polish and Czech (Bohemian), together with the Balto-Slavonic group, Lithuanian, Lettic and Old Prussian (extinct). The oldest form of Slavonic is Old Bulgarian, which is recorded in a Bible translation of the 7th century. This is often called Old Slavonic. The Slavonic contribution to English is inconsiderable, usually indirect, and of no great antiquity. It consists of names of Slavonic products and objects, with, quite recently, a few "political" terms.

Any word of which traces can be found in all the European groups¹ already mentioned—Teutonic, Latin, Greek, Celtic, Slavonic—is called West Aryan.² Examples are *fish*, *mere* (noun), *salt*, *beech*, *elm*, *sallow* (noun), *finch*, *lie* (to recline), *ear* (to plough).

The East Aryan or Asiatic group is sometimes called Indo-Iranian, because it consists of Old Indian, *i.e.* Sanskrit, and Persian³ (Iran is the old name of part of Persia). East Iranian was the language of the sacred books of Zoroaster (? c. 700 B.C.), often called the *Zend-Avesta*, whence the name Zend sometimes given to this language. It is also called Old Bactrian. West Iranian or Old Persian has less ancient records (6th century B.C.). From it is descended Modern Persian, with a very strong mixture of Arabic, due to the Mohammedan conquest of Persia (7th century A.D.).

Sanskrit is the oldest of all the Indo-European languages. Its earliest literature, contained in the sacred writings called the *Vedas*, dates back to 1500–1000 B.C. It was the discovery, in the late 18th century, of this sacred language of the Hindus that gave a firm basis to comparative philology. It must not, however, be supposed that Sanskrit is the parent of the other Aryan languages.⁴ If there were equally ancient records for Celtic, Teutonic, etc., they would form with Sanskrit a family of sister languages, all the offspring of primitive Aryan, with a much stronger family resemblance than can now be traced in them.

But the great antiquity of Sanskrit brings it nearest to this primitive

¹ I have not included Albanian, which has no early records.

² Another classification is into the *centum* and *satem* groups, according to the treatment of the initial, represented in Latin by *c*, in the Aryan names for 100. This brings Slavonic into the East Aryan or Asiatic family.

³ There is also Armenian, akin to West Iranian, and Tocharian, an extinct language of which some records were first found in Turkestan as recently as 1908.

⁴ The modern descendants of Sanskrit are Hindi, Bengali, Mahrati, Punjabi and other vernaculars of Northern India. A middle form of Sanskrit is called Prakrit, to which belongs Pali, the sacred language of Buddhism.

language, and we may assume that any word which it possesses in common with all or most of the Aryan languages must have formed part of the original Aryan stock. The number of such words is not large. It includes the numerals from 1 to 10, the chief names of relationship (*father, mother, brother, sister, widow*), a few anatomical words (*eye, nose, knee, tooth, foot*), many names of animals (*goose, hound, sow, mouse, wether, ewe, cow, wolf, beaver, otter*; see also *fee, udder*), a few trees (*birch, withy*, and the word *tree* itself), one intoxicant (*mead*), and the names of some natural phenomena (*night, star, moon, wind, thunder, east, yester-day*). *Weave* and *wool* point to early industrial arts, *wheel, nave, yoke* to the invention of vehicles, *oven* to a knowledge of cooking, and *door* to the existence of buildings. There are also some pronouns, prepositions and conjunctions, a few verbs expressing "pivotal" activities (*bear, eat, know, love, wit*), and common adjectives (*free, new, sweet, thin, young*).

English also contains a number of early loan-words from the Semitic family—Hebrew, Aramaic or Syriac, Arabic. The Hebrew and Aramaic contribution is mostly religious and reached us through the medium of Biblical Greek and Latin (*abbot, cherub, leviathan, mammon, rabbi, sabbath, shekel*). During the European dark ages the Arabs preserved, and added to, the scientific knowledge of the Greeks and passed on part of their vocabulary to the learned of Europe (*alchemy, algebra, zenith, cipher*). A number of Arabic words, especially those that came through Spanish, preserve the definite article *al-*. The form in which Arabic verbs are given in the Dictionary is really the third person singular of the preterite, which best shows the triliteral root.

The other languages of the world are classed as monosyllabic or isolating (e.g. Chinese) and agglutinative (e.g. North American Indian and the Bantu languages of Africa).

From a very early date words from the non-Aryan languages of Asia and Africa began to reach Europe, usually passing through the medium of Arabic or Greek. The number of such words increased steadily during the Middle Ages, partly as a result of the Crusades. The discovery of America led to a fresh influx of exotics, and, with the progress of exploration, new words are constantly introduced from the remotest parts of the world, so that now "the increase of the English vocabulary from foreign sources has been so enormous that the words of native etymology bear a very small proportion to the whole number of words given in our modern dictionaries" (H. Bradley, *The Making of English*).

EXPLANATION OF SOME LINGUISTIC TERMS

apphaeresis. The same as aphesis.

aphesis. Loss of initial vowel, e.g. *prentice*, *wayward*, or syllable, e.g. *drawing-room*, *tawdry*. See also note on *s-* (col. 738). Such forms are called "aphetic."

assimilation. Tendency of a sound to adapt itself to its neighbour, e.g. L. *collocare* for *con-locare*, E. *snickersnee* for earlier *stick or snee*.

apocope. Loss of final syllable, e.g. *defile*², *signal*², *trove* (treasure).

augmentative. Derived word indicating something larger than the simple word (i.e. the opposite of *diminutive*), e.g. *cutlas*, *trombone*.

back-formation. Formation of a shorter word from one that looks as though it were derived from it, e.g. *beg* from *beggar*, *char*² from *charcoal*.

clip. Reduction of a word to its initial syllable, e.g. *mob*¹, *pub*, less frequently to its final syllable, e.g. *bus*, *van*².

contamination. Alteration of a word by the influence of another word of kindred meaning and approximately similar sound, e.g. the aspirate of F. *haut*, L. *altus*, is due to synon. OHG. *hōh* (Mod. *hoch*).

dissimilation. Tendency of a sound to avoid identity with a neighbouring sound, e.g. *gonfalon* (for *gonfanon*), *sash* (for *shask*), F. *coulour* (for OF. *coureur*).

doublets. Words of identical origin, but different form, e.g. *cod*¹, *quid*¹; *caitiff*, *captiv*. Sometimes there are triplets, e.g. *manœuvre*, *manure*, *manner*², or quadruplets, e.g. *gentle*, *genteel*, *jaunty*, *Gentile*.

epenthesis. Intrusion of a sound facilitating the passage between two other sounds, e.g. *chamber*, F. *chambre*, L. *cam(e)ra*.

epithesis. Addition of final sound, e.g. *sound*¹, ME. *soun*, F. *son*; cf. "drownd," "scholar."

folk-etymology. Tendency to give a more familiar form to an unfamiliar word, e.g. *causeway*, *gillyflower*, or to alter the form of a word owing to a misapprehension of its exact meaning, e.g. *shamefaced* for *shamefast*.

frequentative. Form of verb suggesting the (rapid) repetition of the action denoted by the simple verb, e.g. *waddle* from *wade*, *wander* (cf. *wend*).

ghost-word. A word resulting from an original mistake or misprint, e.g. *collimate*, *syllabus*, *tweed*.

inceptive. L. verb in *-sco*, *-scere*, indicating beginning of action. From this L. *-sco* comes the *-iss-* of F. verbs in *-ir*, whence E. verbs in *-ish*.

intensive. Form of word instinctively altered to express greater vigour, e.g. *scrunch* for *crunch*.

metathesis. Transposition of consonants, e.g. *anlace*, ME. *anelas*, OF. *alenas*, *bird*, ME. *brid*.

pejorative. Depreciatory meaning, in English usually expressed by the suffix *-ard*, e.g. *dastard*, *sluggard*.

portmanteau-word. Deliberate combination of two words for the sake of brevity, e.g. *squarson* (*squire* × *parson*), *Bakerloo* (*Baker Street* × *Waterloo*).

prosthesis. Prefixing of a sound, e.g. *state*, OF. *estat* (Mod. *état*), L. *status*. See also note on *s-* (col. 738).

reduplication. Instinctive tendency, chiefly infantile, to create words by repeating sounds, e.g. *papa*, sometimes with varying vowel, e.g. *see-saw*, or consonant, e.g. *roly-poly*.

tonic stem. Old French verbs changed the vowel of their stem according to the position of the accent (as still *mourir*, *je meurs*, *tenir*, *je tiens*, etc.). Thus OF. *trouver* (see *retrieve*), *relouer*, *reliev* (see *relieve*), *manoir*, *main* (see *remain*), *ordener*, *ordein* (see *ordain*), etc. It is usually from the tonic stem (*trouv*-, etc.) that early English loan-verbs from French are derived.

s-. This initial includes a large number of words of imit. and echoic origin (*slam*, *squeal*, *sizzle*, etc.) and many others which have been altered or influenced by such associations. Initial *s-* also differs from other sounds in its detachable character, and also in the fact that it is often prefixed as an intensive, esp. in *scr-*, *spl-*, *squ-*. The classical example of the first phenomenon is the infantile *tummy*, while *s-mash*, *s-quash*, *s-cratch*, *s-crunch*, etc. illustrate the second. So also *Nottingham* was orig. *Snoltingham*, and *queasy*, *squeasy*, *quinsy*, *squansy*, occur indifferently in early texts. The same peculiarity is noticed in F. (see *Excalibur*, *scaffold*) and far back in the Aryan langs., e.g. *foam* is cogn. with L. *s-prima*, *s-now* with L. *nix*, *nuv-*; cf. G. *μικρός*, small, earlier *σμικρός*. It should be noted also that a large number of words in *sc-*, *sp-*, *st-* correspond to OF. words which were normally spelt *esc-*, *esp-*, *est-*, e.g. *scarlet*, *spice*, *state*. This phenomenon is due to the VL. tendency to prefix a vowel sound in order to facilitate the pronunc. of L. *sc-*, *sp-*, *st-*. ModF. has now usually lost the -*s* (*écarlate*, *épice*, *état*).

sentiment. F. *sentiment*, from *sentir*, to feel, L. *sentire*.

sentinel. F. *sentinelle* (f.), It. *sentinella*. OF. *sentinelle* also meant sentry-box, and I take orig. It word to be a dim. of *sentina*, latrine, used as nickname for sentry-box on rampart. This may seem fantastic, but those acquainted with medieval architecture are aware that the external latrine is not, to the amateur eye, distinguishable from a sentry-box. OF. also has *sentinelle*, sink, jakes.

sentry. Quite unconnected with *sentinel*. It is the popular form of *sanctuary*, as in *sentry-fields*, common in dial. for Church fields. The order of senses is sanctuary, place of safety, shelter for watchman, watchman; cf F. *guérite*, sentry-box (see *garret*), in OF. sanctuary, refuge (from *guérir*, to save), which would now also prob. mean sentry, if *sentinelle* had not been introduced from It.
